THE HOUSE OF CHAMPIONS....

Dear Well Wishers,

We, at JPIS, create a highly participative learning environment to tap the talents of the young minds in both curricular and extra-curricular activities.

Emphasizing a holistic development in students, the school encompasses a host of activities pertaining to academic learning, extra-curricular and sports, nevertheless, striking the right balance between pedantic and creative education.

JPIS strives to provide the right platform for students to compete efficiently and succeed in the global scenario. By nurturing high values, students at JPIS are educated in an ambiance conducive to growth, success, and prosperity.

I am also happy to share with you all the third issue of our newsletter and the board results of our students.. Congratulations to one and all

Roshan Agarwal
Chairman

THE ELECTIONS FOR HEAD BOY & GIRL

In a democratic country, each one has a right to vote. This thought was brought into practice at JP International School on May, 10, 2018 when elections for the position of Head Boy and Head Girl were held.

The entire Electoral Process was upheld in front of the school. The excitement and anxiety could be read not only amongst students, but even amongst Teachers and Administrative staff also. Nomination papers were filed by the eligible candidates of grade XII 2018-19, who not only secured 75% academically but even in co-curricular activities as well. This was followed by scrutiny and final candidates appeared before the panel comprised of the Vice President Mr. Amit Saxena, Principal Ms. Heema Sharma and Sr. Head Mistress Ms. Jhumur Chakravorty. The final candidates for the post of Head Boy were Rahul Pahal, Yash Jain and Karan Bhati, similarly Vishu Kasana, Chanchal Bhati and Urvi were selected as candidates for Head Girl.

BLOG: How is School's Infrastructure Important for Child's Growth?

The term 'infrastructure' stands for that institutionalized framework and consequent facilities embedded within it, which wholesomely sustain and enrich functioning of a country/community or individual establishment. Now when such an operative frame is visualized with respect to a school, what is the fundamental expectation that crops up in mind?

Well, according to child-care experts and educational scholars, a school's infrastructure, principally, must guarantee each student's holistic growth. While the provision of comfort and hygiene are cardinally desired from it, the infrastructure does not reach the peak of perfection until ensuring that best of development will be fetched to each student. It needs to play a cardinal role in each student's progress since its arms and nucleus are the central zones where a child matures from a kid to an adolescent and eventually prepare for the bigger roles in life ahead.

THE QUARTERLY ACTION SERIES FROM JPIS

At school, a young one's fundamental knowledge base gets constructed. This is where children learn to practice the virtuous behaviors of sharing and caring, learn about the worthiness of morality, honesty, and ethics in life, and take the first step towards the endeavors of 'living together' and collaborative working. Hence, it is important that a school's organizational skeleton is indispensably impeccable, futuristic, and furnished with the required cutting-edge amenities. We, at the JP International School, one among the top ten schools in Greater Noida, have paid detailed attention at encompassing all those definite arenas which directly impact the development and betterment of the students at school:

Technology – As a ground norm for student advancement, the school's functional structure requires to be technically sound. Keeping pace with present and approaching times' vibes, classrooms should be equipped with tools like Animated Models, Virtual White Boards, and Digital links that pace up and simplify education and make knowledge accessible and interesting for all children. The JP International School very well fulfills this criterion by refurbishing class ambiances with 2D and 3D modules, apparatuses for Video Graphics, Computerized Work Sheets, and more, in addition to the ever-effective blackboard and white chalk.

Practical Grooming – Whatever be the subject – science, humanities or commerce; each growing up student requires a level of pragmatic exposure towards it for getting accustomed with the advanced and 'in-hand' pedagogical approach practiced at higher education centers. This explicitly depicts that school's operative skeleton must take steps for catering 'hands-on' training to students of literature and social sciences too along with those belonging to the pure science streams. It must endow arts students with opportunities to envision and execute literary projects, build models over read-about politico-economics definitions and theories, and experiment through visual displays and dimensional replicas the viability of certain social hypotheses in present times. To this end, mention must be made about JPIS's multiple 'Hi-Tech' Science Labs and unique Mathematics Laboratory. The last one especially aids students for 'iterative learning' through viewable models of arithmetic theories. The school moreover owns a Sociology Lab, whose prime purpose is to keep humanities learners conversant with the notions of sociological changes and scholastic progress achieved at their study arenas.

Scope for Communication Development – We, at JPIS, believe that a school's responsibility does not end with rendering proper guidance to a student for accomplishing admirable scores. As an explicit guardian of each child, the school must pay heed to development of interactive and inter-mixing aptitude in all the students and must empower them to gain confidence for articulate, fluent, and convincing public speaking. In this regard, it is important that the school needs to shape own functioning skeleton in a definite fashion so that apart from regular curriculums, learners are bestowed with distinctive counseling for nurturing personality growth. JPIS is amongst India's very few Higher Secondary schools, which possesses an exclusive Life Skills Lab for strengthening the real-world understanding of children.

The Habit of Working Together – For becoming true contributory agents of the future world's integrated progress, young ones need to unite and execute. They must learn, from a very early stage, to operate as a team and embed at lending the hand. By including into its working framework, a school can provide to its student's chances for strengthening these skills via scheduling workshops, cultural functions, theaters, and other such 'doing together' activities. To this end, JPIS's spacious amphitheater serves as an impeccable platform for realizing this noble objective and instill in students the skills of collaborating and working together.

What we, at the JP International School, are inherently dedicated at is making the school establish as one literally complete and authentically ahead-of-time institution, preparing and grooming the students as per the international standards.; and this aim of ours has even earned us the recognition of one of the best International CBSE school in Greater Noida 2017. We believe that by providing the students with optimum opportunities for enhancement, our implicit dream of making each student a prized and skillful emissary of future can complacently take shape.
